HERBALS

CHITOSAN

## HERBAL SLIM

"FLUSHES FAT AWAY"

**MAXIMUM  
POTENCY HERBS**

**HERBAL SLIM, LifeSupport HERBALS** is the latest development in the fight against obesity. The super "fat busting" nutrients help to stimulate metabolism, suppress appetite and provide energy while flushing fat globules from the system.

The fat binder **Chitosan** is a non-digestible fiber derived from exo-skeletons of shrimp, crab and lobsters. Because it contains a positive ionic charge, it has the ability to bind to the negatively charged lipids & fats and expel them before they have a chance to digest.

**HERBAL SLIM** is the scientific answer for those who truly want to rid themselves of excess fat - for good.

Each capsule contains:

Chitosan.....	500 MG
Siberian Ginseng (50x1).....	500 MG
Fennel Seed (4x1).....	eq 160 MG
Kola Nut.....	75 MG
Ginger Root.....	50 MG
White Willow Bark.....	50 MG
Chinese Green Tea.....	50 MG
Licorice DGL Form.....	30 MG
Dandelion Root.....	25 MG
Pacific Kelp.....	15 MG
Cayenne.....	15 MG

Note: Because the body does need a certain amount of the right kinds of fat, we suggest EFA's be added to the diet - and taken separately from this product. For maximum results be sure to drink at least 8 glasses of water a day. Not recommended for people allergic to shellfish.

# HERBAL SLIM

## INGREDIENTS AND FUNCTION:

### Chitosan

A non-digestible fiber (found in the exoskeletons of crab, shrimp and lobster) which has the ability to bind to fat, not allowing it to digest. Its positive charge binds to negatively charged lipids. Both pass through the system and are "flushed" away!

### Siberian Ginseng

Provides energy and helps to reduce stress during weight-loss.

### Fennel Seed

An herb that is helpful for digestive purposes. The seeds of this potent herb help to rid the intestinal tract of mucus and relieve flatulence.

### Kola Nut

A caffeine containing herb. It acts as an appetite suppressant.

### Ginger Root

Cleanses the colon, helps with circulatory problems, indigestion and nausea etc. An herbal activator.

### White Willow Bark

Also known as "Nature's aspirin". It helps to make the product thermogenic.

### Chinese Green Tea

Combats mental fatigue. It protects against cancer, lowers cholesterol levels and reduces blood clots. It helps to make this product a "thermogenic" formula - it aids in weight-loss by promoting the burning of fat while helping to regulate blood sugar and insulin levels.

Licorice DGL Form - Promotes adrenal gland function and helps to improve the thyroid. DGL

(Deglycyrrhizinated licorice) may stimulate natural defense mechanisms that prevent the occurrence of ulcers by increasing the amount of mucus-secreting cells in the digestive tract. (This improves the quality of mucus, lengthens intestinal cell life, and enhances microcirculation in the gastrointestinal lining).

### Dandelion Root

Helpful for fluid retention (A diuretic). It cleanses the bloodstream and liver and reduces serum cholesterol and uric acid. Also improves functioning of the kidneys, pancreas, spleen and stomach.

### Pacific Kelp

Useful for obesity. A rich source of vitamins, especially the B vitamins, as well as many valuable minerals and trace elements. It has been used in the treatment of thyroid problems because of its iodine content. It also softens the stool.

Cayenne - An herb assimilator. It aids digestion and improves circulation.
